PRINTING INSTRUCTIONS FOR NYLON FABRICS

Due to the nature of Nylon fabric, special care must be taken throughout the decoration process. Special care must be taken during the decoration process and after.

Here are some tips to effectively decorate these products.

Heat Transfer/Screen Printing:

▪ Garment temperature must not exceed 310°F or 154°C.

▪ Use fast fushion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.

▪ A test sample run is recommended in all printing processes, especially if you have a large order or if your printer does not specialize in
