Finished measurements in inches. Refer to “How to Measure” guide for detailed information on measurement instructions.

Decoration Recommendations

Due to the nature of nylon fabric, special care must be taken throughout the decoration process. Here are some tips to effectively decorate our performance products.

SCREEN PRINTING/HEAT TRANSFERS:

- Garment temperature must not exceed 310°F or 154°C.
- Use fast fushion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.
- A test sample run is recommended, especially if you have a large order or if your printer does not specialize in printing on nylon fabrics
