Finished measurements in inches. Refer to "How to Measure" guide for detailed information on measurement instructions.

## Decoration Recommendations

Due to the nature of nylon fabric, special care must be taken throughout the decoration process. Here are some tips to effectively decorate our performance products.

**SCREEN PRINTING/HEAT TRANSFERS:**

- Garment temperature must not exceed 310°F or 154°C.
- Use fast fushion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.
- A test sample run is recommended, especially if you have a large order or if your printer does not specialize in printing on nylon fabrics
